

INFRON

HEATING SOLUTIONS PRIVATE LIMITED

Specialized in
Infrared & Conventional Heating Systems
Infrared Lamps
Gas IR Emitters & Systems
Ceramic Heaters
UV Systems

About us

We Infron Heating solutions Pvt. Ltd. are pioneer in providing industrial Heating Systems in a way apart from conventional heating processes. We are using efficient, contactless and fast Heating with the help of specialized IR Heaters, Gas Infrared emitters, Ceramic Heaters by means of Electromagnetic Waves. We select proper electromagnetic wavelengths for the specific applications after conducting trials. We also offer UV curing systems for UV inks and paints. We provide convection heating ovens according to the applications & requirements. We also offer rotary dryers.

We provide heating systems in numerous industrial processes such as Drying and curing of coatings & water and solvent based paints on different parts & automobiles i.e. bikes and cars, forming, embossing, laminating, joining, welding, browning, heating, preheating and sterilization of food products. We can also offer Heating products for automations and for conveyor applications with control panels & specialized controllers. We are available to offer Infrared lamps, UV lamps and other different heating products with customized and efficient heating solutions.

We are offering wide range of products in Industries like Paper, Food, Pharma, Textile, Automobile, Foundry, Packaging, Powder Coatings, drying sections in paint booth etc. As per customers requirement we can offer both floor and over-head Conveyorized heating systems, Batch Type, Portable, and Heating-Kits with different controls & panels as per required sophistication.

Our Goal:

We offer the best, optimum, cost-effective & efficient heating systems as per process requirement.

Our goal is to full-fill customer's requirement & customer satisfaction.

Product

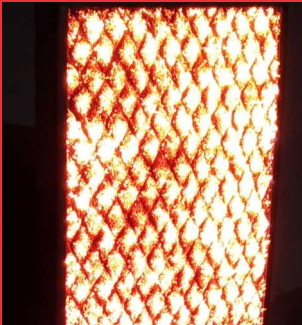

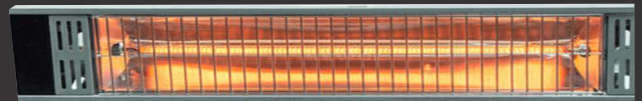

Conveyorized Oven:

Special purpose Conveyorized Infrared oven, as well as gas infrared, hot air and UV based ovens for drying and curing of water and solvent based paints. Drying of power coating parts, Pre-heating the variety of components with energy efficient system floor & over-head system.

IR X's Series:

Infrared compact unit with single and twin-tube infrared emitters with/without air cooling with wide range of power as per the process requirement. Specialized IR unit for room heating application We also provide Infra-Kit which include IR unit & control panel with specialized IR controller.

Gas Based IR systems:

Specially designed Gas based Infrared heating units & systems in collaboration with MFT, United States of America. We design special IR Gas Emitters which runs on LPG, Natural gas, Propane as per fuel availability. Most efficient in Paper industries & powder coating industries. It is used where high intensity and maximum temperature is required in smaller area's & short duration of time.

Lamps:

We provide variety of Infrared lamps with wide range of power. Special gold coated IR lamps to increase the efficiency as well as white coated lamps, UV lamps as per requirement. Twin-tube and single tubes IR lamps and UV lamps with specifically developed wavelength as per the process parameters. All lamps will be India make.

Intellectual property rights:

This is an intellectual property of INFRON Heating Solutions Pvt. Ltd. and is intended for the specific use or review by specific person / organization for whom it is prepared. It is not meant to circulate or to share it to others for getting quotations/details based on the same.

It is advised to use it as a confidential document and should not be shared with someone else rather than for whom it is prepared.
